DETAILED ACTION

Allowable Subject Matter

1. Claims 9-15 and 20-28 allowed.
2. The following is an examiner's statement of reasons for allowance: With respect to independent claims 23, 26 and 28, the instant invention is directed to a remote control device and a system comprising a remote control device communicating with an electronic device. The relevant prior art of record, such as **Allport (6,104,334)** discloses portable Internet-enabled controller and information browser for consumer devices. **Mullaly et al (6,812,881)** discloses system for remote communication with an addressable target using a generalized pointing device. **Feinleib et al (6,346,891)** disclose remote control system with handling sensor in remote control device. **Thompson et al (6,484,011)** disclose a non-telephonic, wireless information presentation device. **Kikinis (2002/0059597)** reference that discloses a method and apparatus for notifying users of interactive functions (scheduled events). **Croy et al (6,509,908)** disclose a personal navigator system. However, neither **Allport, Mullaly, Feinleib, Thompson, Kikinis nor Croy** and any of the cited references teach or suggest, alone or in combination the feature of "...the motion detector detecting different orientations of the remote control device...the processor changing to a mode of operation of the remote control device that corresponds to a particular orientation, such that different orientations of the remote control device control different electronic devices....," as recited in combination with other features of independent claims 23, 26 and 28.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Junkin (6,108,271) disclose remote control device for controlling electronic devices.
